commercial kitchen hand  
sinks.

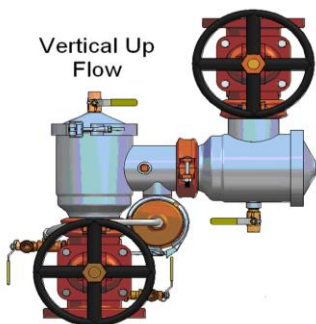

### HOT BOX

Winterize your backflows  
NOW!!!

### Stern Williams

Terrazzo stocked in  
NORCROSS, GA.

### APOLLO VALVES GET Vertical!!!

**Schier Products-** Spotswood recently held training for a local water district on Schier Products and the response was overwhelming. With our flow rates and capacities and small foot print we will be able to provide the utility with a lifetime warranty on our product as well a superior performance. The estimated savings to this utilities' customers on their grease interceptor pump out is astounding. Please contact us to see how Schier can help with your Grease Control.

**Zoeller Company** has recently launched their new website. This interactive site has all the information you could ever want right at your fingertips. Please visit [www.zoeller.com](http://www.zoeller.com) to check out this great website.

**Speakman Company:** Announces a complete redesign of their website. This new design makes it simple to locate the information that is needed. Speakman customers can register for access to portions of the website for their own personal experience. Whether checking stock or looking for technical information this new design makes it a snap. Please visit us at [www.speakmancompany.com](http://www.speakmancompany.com)

### Looking Ahead to the Future of Backflow:

**Apollo Valves** recently introduced their new series of Backflow preventers made out of Stainless Steel. These new backflows are offered in both DC and RPZ applications. Apollo's 4A series backflows are in-line straight patterned valves and are available in sizes 2-1/2" all the way to 12". Apollo's 4AN series are N-patterned valves that can easily be converted to an off-set vertical configuration for that tight spot in a mechanical room. The sizes available are 2-1/2"-12". See bottom left picture for 4AN in vertical configuration. The backflows carry ASSE approval and are currently in test at USC.

### Eternal Training a success:

Oct 1 commenced Spotswood's 1<sup>st</sup> Eternal Water Heater Seminar. Several contractors were on hand for a training class on the World's First Hybrid Hot Water Heater. Stay tuned for announcement of a 3 hour Eternal Service Tech Training School to become an authorized factory trained service technician for Eternal Water Heaters. For more info on Eternal see:

<http://www.eternalwaterheater.com>

**Indiana Seal Company:** Did you know that Spotswood stocks an extensive inventory of Flexible PVC couplings? Indiana Seal couplings are manufactured in the United States by GPK Products. You can also combine Indiana Seal orders with GPK orders in order to make freight. GPK manufactures PVC fittings and is also stocked here at Spotswood.

### Carleys' Corner

Do you how much water a 4" RPZ discharges?

At static conditions the relief valve is normally closed. If trash is in the 1<sup>st</sup> check discharges vary from a small trickle to 20-30 gpm. It depends on the size of debris in the check. If the check is in full open you could see 200, 300, or even 400 gpm depending on the supply pressure. The 4" RPZ is capable of discharging 450 gpm at catastrophic failure at 100psi!! This is rare but designers should plan for all potential relief valve rates.
